National Mass Deworming Programme (18.11.2024 to 23.11.2024)

The Directorate of Family Welfare, GNCTD, has scheduled the National Mass Deworming Programme from **18.11.2024 to 23.11.2024**. Under this programme, a single dose of **Albendazole** chewable tablets will be provided **free of cost** by the government to all students from Nursery to Class XII. Deworming improves health, boosts nutrition absorption, and enhances focus by eliminating intestinal worms.

Parents are requested to choose from the following options regarding the administration of the tablet:

1. **Administered at School:** The tablet will be administered to the child at school under the supervision of the school doctor.
2. **Administered by Family Doctor:** Parents may choose to get their child dewormed by their own doctor.

Kindly ensure that your choice is indicated in the Google form shared in class groups latest by 19th November, 2024
